TECHNICAL PRODUCT PROFILE

# BUGISU A

UGANDA ARABICA · GREEN COFFEE

FAMILY IMAGE · ILLUSTRATIVE

| GRADE | MAIN SCREEN | FORM |
|---|---|---|
| A | 16 | GREEN BEAN |

## TECHNICAL CHARACTERISTICS

| | |
|---|---|
| **Botanical identity** | Coffea arabica |
| **Origin profile** | Bugisu / Mount Elgon, Uganda; confirm lot traceability. |
| **Processing profile** | Washed / wet-processed Bugisu classification. |
| **Screen reference** | 16 / 6.30 mm nominal aperture (UCDA). |
| **Screen distribution** | 16: 90% · 15: 8% · 12: 2% · published grading reference. |
| **Defect reference** | 7% by count · UCDA table 24; verify actual lot. |
| **Physical form** | Flat bean; unroasted export coffee. |
| **Packing / storage** | 60 kg jute is a common trade pack; agree liner and net weight. Keep dry, clean and away from odours. |

**APPLICATIONS / BUYER SELECTION**

Roasting, blends and specialty evaluation. Grade indicates physical classification; cup quality must be established by sample.

**SUPPLIED-LOT CONFIRMATION**

Moisture, actual screen analysis, defect count, cup score, crop year and certification require lot-specific confirmation.

Research profile; not a certificate of analysis or a shipment guarantee.
