BHP	SPECIFY	GREEN COFFEE

TECHNICAL CHARACTERISTICS

Product identity	BHP is a family of UCDA undergrade classifications.
Required subgrade	Specify BHP 1899, 1599, 1299, 1199 or 10.13 on the contract.
Size variation	1899: screen 18 min. 80%; 1599: screen 15 min. 70%.
Further size variants	1299: retained above screen 12 min. 80%; 1199: below screen 12.
BHP 10.13	Light and broken beans rejected during primary processing.
Published tolerance guide	Sound beans: 15% for 1899/1599/1299; 10% for 1199/10.13. Verify exact grade.
Foreign matter guide	UCDA BHP tables: extraneous matter 2%; stones/metals 0%; dust-free.
Packing / release	Segregate by subgrade; approve sample and intended use before dispatch.

APPLICATIONS / BUYER SELECTION

Buyer-approved blending or processing applications, subject to the specified subgrade and fitness assessment.

SUPPLIED-LOT CONFIRMATION

BHP alone is not a complete size specification. Confirm subgrade, moisture, defects and batch suitability.

Research profile; not a certificate of analysis or a shipment guarantee.
